

My Health Success

I'm back on my feet

Marie Hicks

The motivation

Marie, an active volunteer with Meritus Medical Center's Auxiliary, began slowing down due to knee pain. Even getting out of bed in the morning was difficult, and it made her feel older.

The action

Marie saw an orthopedic specialist about her pain. Because her joint was beyond the point where physical therapy alone would help, she decided to have surgery at the Center for Joint Replacement.

The reward

With her new knee, Marie has continued her volunteer work with gusto. "I love meeting people and being active," she said. "Joint replacement was the right decision for me."

Your Health Success

If your quality of life is being affected by joint pain, consider joint replacement surgery at the Center for Joint Replacement, a nationally recognized program with proven results. Call today for more information: **301.790.8060**
